**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 20-22 and 25-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishibashi (U.S. Patent No. 6,558,050 B1).

Ishibashi shows a camera using reference numeral 1; a plurality of physiological sensors using reference numerals 4, 8 and 13-16; and a controller using reference numeral 5. Note column 6 lines 6-12 disclosing that the low power consumption mode is a non-shooting mode where steps 70, 75 and 80 are not performed. Thus, in this arrangement Ishibashi has disclosed that images are captured only when the physiological sensors detect an excited state of the photographer and thus fully meets the limitations of claims 20-22 and 25-27.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2851

4. Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ishibashi (U.S. Patent No. 6,55,050 B1) in view of Gevins (U.S. Patent No. 5,447,166).

Ishibashi shows the claimed invention, as explained above, except for one of the physiological responses being a blink of an eyelid of the user. Gevins teaches that the blink rate of the human eye is an indicator of awareness or emotional state. It would have been obvious to one of ordinary skill in the art to provide the device of Ishibashi with an eye blink rate detector in order to obtain the desirable feature of greater probability of picture taking when the photographer is in a state of high awareness or emotion.
